# Postman测试Spring Boot后端应用指南

# 1. 准备工作

#### 首先确保:

- Spring Boot应用已成功启动(默认端口为8080)
- MySQL数据库已配置并运行(应用配置中使用的是 todoappdb 数据库)
- Postman已安装

# 2. 创建Postman集合

- 1. 打开Postman,创建一个新集合,命名为"TodoList API测试"
- 2. 不使用变量,直接在每个请求中使用完整URL

# 3. 用户相关API测试

# 注册用户

- 方法: POST
- URL: http://localhost:8080/api/users/register
- Body (raw, JSON):

```
"username": "testuser",
"password": "password123",
"email": "test@example.com"
}
```

# 用户登录

- 方法: POST
- URL: http://localhost:8080/api/users/login
- Body (raw, JSON):

```
{
  "username": "testuser",
  "password123"
}
```

# 4. 分类管理API测试

# 获取用户的所有分类

- 方法: GET
- URL: http://localhost:8080/api/categories/users/testuser

# 创建新分类

- 方法: POST
- URL: http://localhost:8080/api/categories
- Body (raw, JSON):

```
{
    "name": "工作",
    "color": "#FF5733",
    "username": "testuser"
}
```

# 更新分类

- 方法: PUT
- URL: http://localhost:8080/api/categories/1
- Body (raw, JSON):

```
{
    "name": "工作任务",
    "color": "#3366FF",
    "username": "testuser"
}
```

# 删除分类

- 方法: DELETE
- URL: http://localhost:8080/api/categories/1

#### 批量删除

- 方法: DELETE
- URL: http://localhost:8080/api/categories/batch

# 5. 标签管理API测试

# 获取用户的所有标签

- 方法: GET
- URL: http://localhost:8080/api/tags/users/testuser

# 创建新标签

- 方法: POST
- URL: http://localhost:8080/api/tags
- Body (raw, JSON):

```
{
    "name": "紧急",
    "color": "#FF0000",
    "username": "testuser"
}
```

# 更新标签

- 方法: PUT
- URL: http://localhost:8080/api/tags/1
- Body (raw, JSON):

```
{
    "name": "非常紧急",
    "color": "#CC0000",
    "username": "testuser"
}
```

# 删除标签

- 方法: DELETE
- URL: http://localhost:8080/api/tags/1

# 6. 待办事项API测试

# 获取用户的所有待办事项

- 方法: GET
- URL: http://localhost:8080/api/todos/users/testuser

# 带有过滤条件的待办事项查询

- 方法: GET
- URL: http://localhost:8080/api/todos/users/testuser?
   done=false&priority=1&categoryId=1&search=会议

# 创建新待办事项

- 方法: POST
- URL: http://localhost:8080/api/todos
- Body (raw, JSON):

```
"description": "完成项目报告",
"done": false,
"targetDate": "2025-06-01",
"username": "testuser",
"categoryId": 1,
"priority": 2,
"reminderTime": "2025-05-31T09:00:00",
"notes": "需要包含上季度的数据分析",
"tagIds": [1, 2]
}
```

# 更新待办事项

- 方法: PUT
- URL: http://localhost:8080/api/todos/10007
- Body (raw, JSON):

```
{
    "description": "完成项目最终报告",
    "done": true,
    "targetDate": "2025-06-01",
    "username": "testuser",
    "categoryId": 1,
    "priority": 3,
    "reminderTime": "2025-05-31T09:00:00",
    "notes": "已完成所有数据分析",
    "tagIds": [1]
}
```

# 删除待办事项

- 方法: DELETE
- URL: http://localhost:8080/api/todos/10007

# 获取统计信息

- 方法: GET
- URL: http://localhost:8080/api/todos/users/testuser/statistics

# 获取即将到期的提醒

- 方法: GET
- URL: http://localhost:8080/api/todos/users/testuser/reminders
